

As a customer

I want to reserve a car online

So that I can get the car I want on time.

Customer must have a valid driver's license.

As an employee

I must check the customers driver license

So that the customer is eligible to rent a car

Each rental has a pickup date and return date.

As a customer

I want to fill the pickup date and return date form

So that I can pick, and return the car on specific time.

Customer can rent only one car at a time.

As an employee

I must check list of customers

So that no customer can rent more than one car

Customer can see fleet of our cars on the system.

As a customer

I have to see the list of cars

So that I can choose a car that I need to rent

Customer can select and make reservation of our available cars.

As an employee

I have to see the list of available cars

So that I can differentiate list of cars that are reserved or not.

Customer can search for a particular brand or model of cars on the system.

As a customer

I want to search a car by its brand and model

So that I can choose a car what I want.

The system keeps track of all our cars currently rented and not rented.

As an Employee

I want to know list of cars

So that I can categorize the list of cars who are rented or not.

It is possible to extend the return date of the rented car for additional fee.

As a customer

I can extend return date

So that I can keep the car for more time.
